

Time and Complexity in Historical Ecology: Studies in the Neotropical Lowlands (Historical Ecology Series)

This collection of studies by anthropologists, botanists, ecologists, and biologists is an important contribution to the emerging field of historical ecology. The book combines cutting-edge research with new perspectives to emphasize the close relationship between humans and their natural environment. Contributors examine how alterations in the natural world mirror human cultures, societies, and languages. Treating the landscape like a text, these researchers decipher patterns and meaning in the Ecuadorian Andes, Amazonia, the desert coast of Peru, and other regions in the neotropics. They show how local peoples have changed the landscape over time to fit their needs by managing and modifying species diversity, enhancing landscape heterogeneity, and controlling ecological disturbance. In turn, the environment itself becomes a form of architecture rich with historical and archaeological significance. Time and Complexity in Historical Ecology explores thousands of years of ecological history while also addressing important contemporary issues, such as biodiversity and genetic variation and change. Engagingly written and expertly researched, this book introduces and exemplifies a unique method for better understanding the link between humans and the biosphere.

Studies in the Neotropical Lowlands Time and Complexity in Historical Ecology explores thousands of years of ecological history Historical Ecology Series. Time and Complexity in Historical Ecology: Studies in the Neotropical Lowlands. Front Cover. Professor William Balee, Symposium on Neotropical Historical Ecology, Professor Clark Erickson. Columbia University Press, 2006 - Nature - 417 pages Ecology: Studies in the Neotropical Lowlands Historical ecology series. Booktopia has Time and Complexity in Historical Ecology, Studies in the Neotropical Lowlands by William L. Balee. Buy a discounted Hardcover of Time and Buy Time and Complexity in Historical Ecology: Studies in the Neotropical Lowlands (Historical Ecology Series) by William Balee, Clark L Erickson, Clark This series explores the complex links between people and landscapes. Time and complexity in historical ecology : studies in the neotropical lowlands / edited. 500 meters. As shown in this volumes case studies, the neotropical lowlands historical ecology because landscape ecology has distinguished between land-. In W. Balee & C. Erickson (Eds.), Time and complexity in historical ecology: Studies in the neotropical lowlands (pp. 1-20). New York: Columbia
